Hi Taylor,

Happy Friday!

I wanted to check to see if I could receive the corner coordinates today, and any other reporting you can send. I am on a deadline and need at least the coordinates before the weekend.

I can wait for the invoice, but would like to settle up on that as well, if possible.

Thanks!

Matt

Hello Matt,

Stacy will be sending you the coordinate values for your lot corners at the end of the day today. Please note that while these coordinates are accurate enough to aid in the recovery of the monuments, they are not absolute in relation to the physical location of your corners.

The record of monument forms will be sent into the Recorder's Office today and I will send you a copy complete with the Recorder's stamp once upon recording.

Our accounting staff is out of the office, but I will have an invoice by Monday.

Thank you,

Taylor Moore, PLS

Matt,

The purpose of this email is to notify you that as of July 28, 2017, Enterprise Engineering, Inc. has completed the boundary survey of the subject parcel, legally described as Tract 3, Potter Creek Subdivision, per Plat No. 71-202. While conducting this boundary survey, the two southern property corners were recovered and the two northern corners were determined to be unmonumented/missing. We recovered monumentation of record on adjacent parcels which were used to compute the location of and install the monuments on the two northern property corners. Our measurements of recovered and set monumentation agree record information with little to no discrepancy. Record of Monument forms for the northern corners, set this survey, are in the process of being recorded with the Alaska Recorder's Office and we will provide you with copies of these documents once recorded.

Please let me know if you have any additional questions.

Thank you,

Taylor Moore, PLS

Hi Stacy,

Very cool, thanks for sending.

Have a great weekend!

Matt
